

RUTEC anti-splash curtains stands up to MP 7!

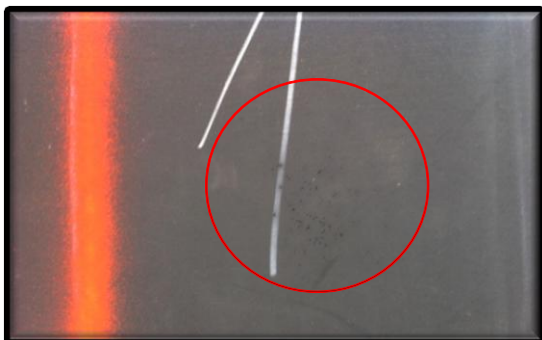

Testing with MP7 of the company Heckler & Koch with hard-core- and soft-core ammunition have shown, that our anti-splash material R1078 in spite of the massive penetrating power of this weapon hardly leave wear tracks in the splinter protection.

A suitable shooting test occurred in March, 2011 on a range of the armed forces (Bundeswehr). They fired 1500 rounds of hard-core- and soft-core projectiles at our RUTEC R1078 and at the present anti-splash material from approx 15 meters on a defined surface.

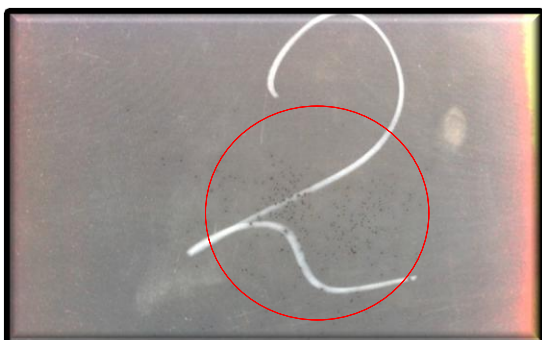

The photos show unambiguously the excellent locking qualities of the natural rubber and the lifetime resulting from it.

RUTEC R1078 in 6mm

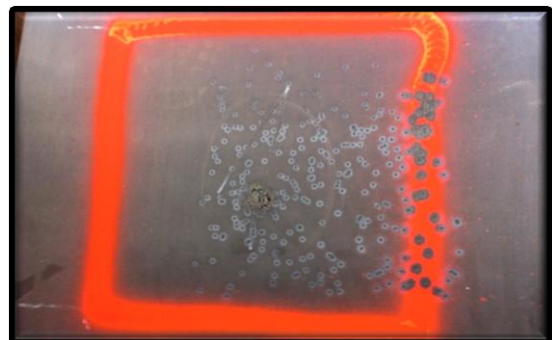

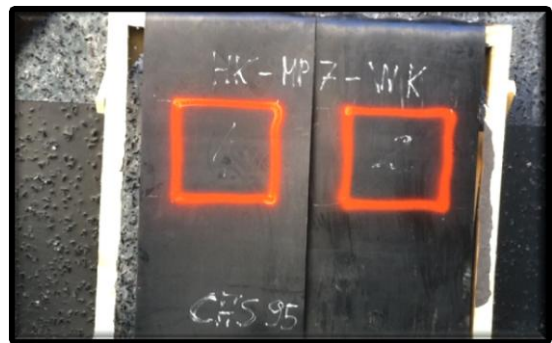

Hard-core projectiles (ca. 500 rounds)

Soft-core projectiles (ca. 1000 rounds)

Standard-material in 6mm

Hard-core projectiles (ca. 500 rounds)

Soft-core projectiles (ca. 1000 rounds)
