

Rutec anti-splash protection for establishments and labs

Rutec natural rubber is used since December 2010 also as a splinter and ricochet protection for different establishments and labs.

Bursting glasses or pistons are taken up successfully by the extremely tear-proof rubber and leave only one low incision.

The material can be installed on hanging systems for a ceiling construction or on mobile bearers. Rutec anti-splash protection is in different colors and strengths of 1.6 mm – 25 mm available.
